

CP4

GPS-Enabled 4-Channel Mobile DVR

The CP4 is a DVR recorder system designed for the industrial truck market. It comes with up to 200 hours of video and audio recording storage and supports up to 4 cameras. Optional web-based software, cellular and WiFi connectivity options are available. Functioning of CP4 is second to none, as it records exactly what happened before, during and post incident. This powerful system can be used by management for keeping track of their operators, equipment usage, equipment location, precise checklist completion, impact force of an accident, damaged product, and verifying false accidental claims. Time stamped video can also be used for increasing awareness for shift timing.

Features

- 720P recording on all CH 1-3, D1 on CH 4.
- 128GB SD storage capacity, record up to 150 hours of footage on all 4 cameras
- Customizable video resolution and frame rate
- GPS records full-time data to provide accurate location, vehicle speed and date/time
- Google Maps integration for precise route tracking
- Driver activated events can be controlled through wired remote control and event record button
- Advanced search function with filters for time/date, event, vehicle speed
- Cameras are IP69K Waterproof rated
- Optional Web Based Software for notifications as well as quickly reviewing events without having to pull the SD Card – Cellular and Wi-Fi options are available

Problems Solved

False Claims and Accusations: Live tracking of events (before, during and after event)

Enhanced Training: Training drivers with pre-recorded videos

High Quality Night Recording: IR vision weatherproof cameras

Unauthorized Access: DVR comes with a key locked vented box

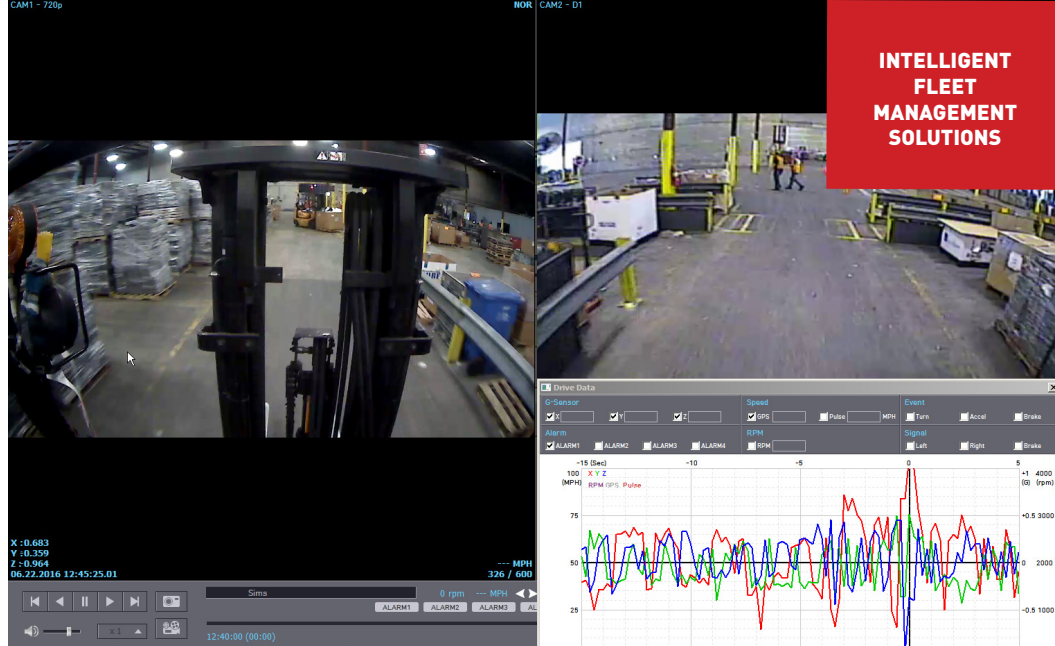

Safety and Accountability: Reinforces the safe operations and provides evidence of incident accountability

Lift Truck Fleet Management with Comprehensive Telematics
